The German Longitudinal Election Study (GLES) is the central scientific survey programme in Germany for the continuous collection and provision of high-quality data for national and international election research. The methodologically diverse surveys of GLES make it possible to investigate the political attitudes and behaviors of voters and candidates. GLES has been carried out in close cooperation between the German Society for Electoral Studies (DGfW) and GESIS - Leibniz Institute for the Social Sciences. More information are available here: www.gles.eu.

The GLES Panel allows users to study intra-individual change in political attitudes and behaviors during the election campaign, as well as investigate long-term change between federal elections. It is a longitudinal survey of the same individuals of currently two different samples. Sample A consists of four sub-samples. The main sample A1 (2016), the re-contact sample A2 (2013), and the refreshment sample A3 (2017) contain the respondents from the Short-term Campaign Panel of the GLES 2017. Therefore, it is also referred to as the “2017 Election Campaign” sample. Respondents of the new sample A4, “2021 Election Campaign”, was recruited in fall 2020 completing the sample A. In contrast, Sample B, “2017 Pre- and Post-Election Cross-Section”, includes respondents from the 2017 Pre- and Post-Election Cross-Section of GLES (ZA6802) who agreed to be re-interviewed in the GLES Panel.

In the following, you will find some general information about the data sets and the documentation of the questionnaire of all waves.

Methodology

Geographic Coverage	Germany (DE)
Universe	<p>[Sample A] All German citizens with internet access who were eligible to vote in the 2017 (sample A1-A3) or rather 2021 (sample A4) election to the German Bundestag.</p> <p>[Sample B] All people with German citizenship resident in the Federal Republic of Germany, who had a minimum age of 16 years and lived in private households at the time the survey was being conducted.</p>
Selection	<p>[Sample A] Quota sampling of the frame population of the Online-Access-Panel by age, gender and education.</p> <p>[Sample B]</p>

Respondents of the 2017 Pre- and Post-Election Cross-Section who gave their willingness to participate in the re-interviews of the GLES Panel. For the 2017 Pre- and Post-Election Cross-Section respondents were selected by random sampling on the basis of local population registers with an oversampling of population in East Germany.

Mode of Data Collection [Sample A]

Computer-assisted web-based interviews (CAWI)

[Sample B]

Recruitment with computer-assisted personal interviews (CAPI), Mixed-mode data collection with self-administered, computer-assisted web interviews (CAWI) and paper and pencil interviews (PAPI); from wave 13 on: CAWI only

Data access

Terms of access Data and documents are released for academic research and teaching: Category A

Sample B datasets will be made available upon signing an off-site data use agreement. If you are interested, please refer to the "Data Access" document for more information.

Due to data protection regulations, some variables can also only be made available after signing an off-site data use agreement or can only be used on-site at the Secure Data Center (SDC) at GESIS (Cologne, Mannheim). If you are interested, please contact us at gles@gesis.org.

Errata

The most recent errata list is provided on the site of the GESIS Data Catalogue (www.gesis.org/dbk) where you also find a list of all changes made between the different versions of the dataset.

You can find more information about GLES online: <https://www.gles.eu>.

Notes on this documentation of the questionnaire

The questions are not listed in the order of the questionnaire sequence but are sorted according to topic categories. The sequence can only be taken from the wave-specific questionnaires or the documented screen views, which are also available at GESIS.

The complex filtering procedures within the subject areas verification and voting decision are illustrated at the beginning of the respective module by progress diagrams. The exact filter conditions are given with each question.

In the GLES Panel, numerous measures were taken to assess the quality of the survey data obtained. In this context, an instructed response item was presented to the respondents in some waves. Such questions were built into standard matrices and are always marked with the abbreviation "q" at the end of the variable name (e.g. *kp1_050q*). Example: In the matrix battery for the "Efficacy" concept, the instructed response item was: "Please choose 'agree' for testing the functioning of the questionnaire".

Table 1: Questionnaire Explanation

Presentation	Examples	Explanation
X	kpX_010	"X" is a placeholder in the variable name for the respective wave. For example, the variable "political interest" was collected in all waves and is stored in the dataset under the variable names <i>kp1_010</i> , <i>kp2_010</i> , ..., <i>kp9_010</i> . In this complete questionnaire, a separate listing of all wave-specific variable names is omitted. Instead, <i>kpX_010</i> is written in the title of the question. Please note: Within filter conditions, the "X" always refers to the number of the current wave in which the filter was used. If filters refer to variables from previous waves, the concrete wave number is specified in the variable name.
[X]	Waves: [5]-[7],8 Waves: 6,[7],[8]	For each question, the waves in which it was asked are displayed above the wording. If a wave is enclosed in square brackets, this means that not all participants of the corresponding wave received the question. There can be two reasons for this. First, the postal voters were asked questions about their voting behaviour immediately after their postal vote (in waves 5 to 7), while the "regular" voters received these questions only in the post-election wave 8. Second, certain questions from previous waves were taken up if the respondents had not participated in those waves. One example is the question about the use of Wahl-O-Mat, which was put to all participating respondents in the sixth wave. In the seventh wave, only those people who had not taken part in the sixth wave or had stated at the time that they had not used the Wahl-O-Mat were asked this question. In the eighth wave, only people who had not participated in the sixth and seventh waves, or who had indicated in those waves that they had not used the Wahl-O-Mat, received this question. The concrete meaning of the square brackets can be seen from the design of the filters.

Intro: You've almost reached the end of the survey and you're about to get your 200 mingle points. Finally, we have **four screens** with questions about your personality. We are aware that these questions often sound very similar. We would be very happy if you could take the time to answer these questions. By doing so, you will help us a lot! In the upcoming surveys of the GLES study, we will not ask you these questions again.

At the end, you can tell us how you liked our survey and what we can do better in the future.

Intro:

In what follows, several people are described on the basis of what is important to them.

Question screen 1:

Please indicate how much each person is or is not like you.

(A) Thinking up new ideas and being creative is important to him/her. He/she likes to do things in his/her own original way.

(B) It is important to him/her to be rich. He/she wants to have a lot of money and expensive things.

(C) He/she thinks it is important that every person in the world should be treated equally. He/she believes everyone should have equal opportunities in life.

(D) It is important to him/her to show his/her abilities. He/she wants people to admire what he/she does.

(E) It is important to him/her to live in secure surroundings. He/she avoids anything that might endanger his/her safety.

Question screen 2:

And how much is this person like or not like you?

(F) He/she likes surprises and is always looking for new things to do. He/she thinks it is important to do lots of different things in life.

(G) Having a good time is important to him/her. He/she likes to "spoil" himself/herself. **(not asked in wave a2)**

(H) It is important to him/her to listen to people who are different from him/her. Even when he/she disagrees with them, he/she still wants to understand them.

(I) It is important to him/her to make his/her own decisions about what he/she does. He/she likes to be free and not depend on others.

(J) It is important to him/her to be humble and modest. He/she tries not to draw attention to himself/herself.

(K) It is very important to him/her to help the people around him/her. He/she wants to care for their well-being.
